BOOK REVIEW

Bibliography of Interlingual Scientific and Technical Dictionaries (Fifth Edition). 1969. Unipub, Inc., P.O. Box 433, N.Y., N.Y. 10016. 250 p. Cloth, \$9.00.

This is an unusual bibliography since it covers 2,491 dictionaries under 263 subject headings and 75 languages. Over 200 entries are cross-referenced, and there is an index to author, subject, and language. There are only 16 dictionaries listed under zoology and 1 under "Insectology", although a variety of other entries would also be of interest to biologists. A great time-saver in locating such dictionaries.—R. E. Woodruff.
